

Mastering Research Translation

Workshop length: Half Day workshop

Objectives: To understand translation principles and frameworks

Target audience: Researchers, research support staff

Why train with us?

We are the leading provider of translation and impact training programs, coaching, consulting and membership in Australasia

Workshop Facilitator - Dr Tamika Heiden

As Principal of the Research Impact Academy, Tamika has dedicated herself to the art and science of research impact, built a program of learning experiences to support researchers and developed partnerships with international experts and a world-leading paediatric hospital, all in the interest of ensuring that research can change the world!

OVERVIEW

Knowledge translation (KT) is about getting the right information to the right people, at the right time, and in a format they can use. With so much terminology used for translation, and as many definitions to match, it can be quite confusing. This workshop guides participants through the system of translation and how it fits with the traditional research process.

The workshop is based on the principle that to learn, we must do. For that purpose we ensure that where possible implementation is done in session.

TOPICS COVERED

Introduction to Knowledge Translation

- Understand terminology and definitions
- Learn about the translational pathway
- Why a pathway is useful in obtaining your translation goals
- The evidence base for research translation
- Choosing the right framework

How to plan for translation

- Elements of a KT plan
- Developing your your translation goals
- Identifying activities and strategies for your translation
- Understanding the evidence base for translation

Discover how to embed translation in existing projects

- Considerations for your project at each element of the translation pathway.
- Understanding differences between stakeholders, partners and beneficiaries of your work

LEARNING OUTCOMES

At the conclusion of the workshop, participants will have mapped their goals, learned how to build and manage their networks, identified potential project stakeholders, identified relevant outputs and considered the impact type, indicators and evidence for their goals.

Participants leave with a plan and three action items to be addressed during their follow-up coaching call.

"If I had done this KT Australia workshop with Tamika before embarking on my project, I would have been more successful in actually conducting knowledge translation in its true form - from dissemination to implementation in practice."
Loretta Piccenna, Post Doctoral Research Fellow, Latrobe University

With a recent introduction to the concepts of KT I was excited and hopeful to be referred to Knowledge Translation Australia. I found Tamika to be a great ambassador for the place and processes of KT in research and practice. I look forward to contributing to the 'closing of the loop' Krista Watts, Peter Doherty Institute for infection and immunity.
